

AN ONLINE PLATFORM FOR CAR INSURANCE

Industry
Insurance

Technology
ASP.NET | MySQL

ABOUT PROJECT

The CEO of the an established insurance company in partnership with the largest Insurance Co. in Europe, met with the CEO of our company in 2015. His idea was to recreate the platform for buying car insurance policies. At the meeting, we became his thinking partner rather than just a development partner.

THE REQUIREMENT

- Redesign & Re-Development of the Platform with new Features
- Admin System with Dashboard for Tracking & Ease in Management
- Optimization of Backend Management

“ We became our client’s thinking partner, enabled them with a new solution architecture that added value to their business and helped them to partner with the largest insurance company in Europe ”

AN ONLINE PLATFORM CAR INSURANCE

Industry
Insurance
