CLOUD BASED ERP FOR DAY CARE MANAGEMENT

Industry

Education

Technology

Ext JS | **Microsoft .NET** | **iOS** | **Android**

ABOUT PROJECT

Our client, a veteran providing Day Care Facility for over 20 years in the US, required a software that makes day care management simple. With a requirement document of 350 pages, their idea was to create an ERP solution that can be optimally utilized by other such Day Care Centers.

THE REQUIREMENT

- Cloud based ERP System with the latest technology
- Intuitive UI Design for ease in management
- Transparency in system for safety of children
- Dynamic calendar for monitoring
- Improved Communication between stakeholders
- Web Portal & Mobile Apps for all stakeholders: Managing Director I Teachers I Parents

> " We created an ERP System that enabled our client to automate Day Care Management and brought transparency in operations for teachers and parents "

CLOUD BASED ERP FOR DAY CARE MANAGEMENT
