PLATFORM FOR FINDING DOCTORS & APPOINTMENT SCHEDULING

Industry
Healthcare

Technology
Codeigniter | jQuery

ABOUT PROJECT

Our client from Germany, an address & information provider had data of more than 370,000 medical and social institutions. Their requirement was for a platform, that connects these practitioners and social institutions with the platform, with advanced features of online appointment booking. Also, they needed to integrate a Webshop for buying prescribed drugs online.

THE REQUIREMENT

- A Platform to find Doctors Online & Book Appointments
- Webshop for Buying/ Ordering Drugs Online
- Advanced Search with Navigation, Filters, kind of Doctor etc.
- Scope for Users to Upload Diagnosis/ Treatment
- Scope for Users to find Jobs/ Trainings at Medical Institutions
- Scope for Doctors to Publish Job Openings & Update Patient Data

" We built a platform that created a network of doctors and nursing industry, that enabled job openings & connected doctors to patients online. "

UI DESIGN – WEB DEVELOPMENT – SUPPORT

THE SOLUTION

- Online platform with dynamic filters like location, type and reviews
- Integration with third party API for Health encyclopedia & knowledge updates
- Integration with Pharmacy Webshop
- Integration with Job Openings
- The Doctors can do the following:
  - o   Publish job openings at their clinics
  - o   Upload important information/ articles/ knowledge updates
  - o   Update patient profile for treatment, prescription and future plans

THE BENEFITS

Ease in Finding Nearby Doctors

Ease in Finding Jobs in Health Care Industry

Online Ordering of Medicines

Convenience in Treatment for Doctors
