FRONT END DEVELOPMENT - SUPPORT

ABOUT PROJECT

Our client from Norway is a provider of technology platforms and statistical models giving probabilities of sporting outcomes. They specialize in sport betting and their technology is used by trading companies to serve online betting markets globally. Their idea was to create a platform for LIVE sports betting for football fanatics that could be a MVP for sports events eventually.

THE REQUIREMENT

- Online Publishing Platform for LIVE Sports Betting
- Single Page Application in Aurelia Framework – Latest JavaScript
- Modular Front End with Interesting User Interface
- Publishing in Real Time
- Ease in Management of Content

“ The platform offered real-time information to engage their audience. Management of content became easier. ”
